

Businesses benefit when field personnel are equipped with a ROV Scanner connected to a BlackBerry® smartphone and powerful application software. Shortened service and billing cycles as well as improved accuracy and record keeping allow for heightened customer service while improving the bottom line.

**Transportation • Manufacturing • Logistics
Hospitality • Government • Professional
Construction • Retail • Healthcare • Security**

No matter the industry, company size or particular business needs, Microvision has a large community of software vendors that offer complete mobile solutions for BlackBerry. These solutions leverage the strengths of the **Simple, Affordable and Connected ROV Bar Code Scanner.**

Mobile Forms	Sales Force Automation	Point of Delivery	Asset & Inventory	Field Service Automation	Location Based Services	Mobile Point of Sale

Microvision's software development community has integrated the ROV Scanner into a wide range of mobile applications for BlackBerry. These applications have been designed to satisfy the needs of customers in Small/Medium Business, Enterprise and Government.

Verizon Wireless Field Force Manager is a powerful web-based application combined with a handset application that provides visibility and control for all of your mobile workers. It's a turnkey wireless-solutions package that's breaking new ground in resource tracking and management. It is composed of three solution modules: Location Tracking, Electronic Timecard and Job Dispatch. Field workers use ROV Scanner to scan parts used, assets serviced and more.

etrace® by Gearworks is a Web application that is available on Sprint, AT&T and other leading wireless carriers and manages mobile employees using their GPS enabled BlackBerry smartphones. Ready to be integrated into hundreds of back-office applications with configurable alerts, reports, and workflows, etrace is the best choice for SMB and enterprise field service, distribution, and health care customers. Field workers use ROV Scanner to scan parts used, assets serviced, and more.

Mirifex provides solutions for BlackBerry smartphones, un-tethering critical business information from back at the office, and placing it in the hands of mobile workers. FieldFX, developed for field service organizations, provides workers with an overview of service requests and scheduled tasks on their handheld and enables them to record an array of information from each service call.

InCode offers a range of software solutions from Bronze (forms) to Platinum (complex systems integration.) Their experience with complex business processes in mobile environments and modular solution architecture enables quick and inexpensive mobilization of any business process in a way that is simple for your workforce to use. Dexterra's end-to-end solutions help companies, large or small, experience rapid deployments, greater returns, heightened customer and user satisfaction and a longer lifespan over any other competing solutions.

WIC Forms allows customers to quickly recreate their paper forms into a BlackBerry application using Wallace's drag and drop forms creation application. WIC DB can also enable two-way synchronization between the BlackBerry and the customer's backend database. Wallace applications are perfect for small to medium sized businesses transitioning from paper to electronic, mobile processes.

mAssetTracker from mAXBridge is a cost effective, powerful, yet easy-to-use mobile asset tracking solution. Based around the BlackBerry solution and ROV Scanner; it offers reliable tracking of any bar-coded asset. From Vehicles to IT Hardware, or Documents to Delivered Goods, mAssetTracker provides up-to-date information which includes Time/Date, Status and location (GPS if required).

Wireless Merchant is a BlackBerry application that allows merchants to process Invoices, Orders or Quotes while accepting credit card authorizations and updating back office accounting systems such as SAGE Business Vision, SAGE Accpac ERP, and more. Wireless Merchant utilizes cutting edge Bluetooth printers and bar code scanners for quicker and more efficient processing.

Actsoft is a full mobile management solutions software house, offering client and web based GPS, software applications and devices to businesses of all sizes. CometTracker solutions enable wireless worker location and time card tracking, job dispatch, work order automation, resource tracking and more. Solutions available: Comet Tracker, Comet Mobile Worker and Comet Tracker Web.

Mint turns a BlackBerry smartphone into a cash register so you can invoice and get paid on the spot. No more chasing invoices, bad debts and wasted hours on administration or bookkeeping. It also includes an online system to download sales into accounting software.
